Take BEAM's 5 minute survey on training and capacity building

Debora Randall

All blogs

Help us understand and identify unmet needs in capacity building in the market development sector.

This short **survey** makes up part of a wider study commissioned by the BEAM Exchange to better understand and identify unmet needs in capacity building in the market development sector. Please help us to better understand how training and capacity building is helping you (or not) become a better practitioner. This will inform future initiatives to improve the quality and access of capacity building services.
